

# Minor Fixes

## Much Ado About Shells

Under normal configuration, when creating a user under Ubuntu, the default shell is set to /bin/sh. To change the default shell, edit /etc/vz/dists/scripts/set\_userpass.sh. Here is the diff.

### set\_userpass.sh.diff

```
36c36
<         useradd -m "${user}" 2>&1 || exit $VZ_CHANGEPASS
---
>         useradd -m "${user}" -s "/bin/bash" 2>&1 || exit $VZ_CHANGEPASS
```
